B- BACKGROUND OF THE SCHEME

Keeping in view the importance of agriculture sector in economy, the government has launched National Agriculture Emergency Programs (NAEP). Objective of the program is to increase agriculture productivity significantly in five years of the project. Pakistan has potential to increase average production of major crops but the gap in the yield per acre between progressive and non-progressive grower is double due to lack of application of certified seed and other factors.

Quality and certification of seed has a direct and significant impact on productivity. An improved variety or hybrid can make a difference to production to the extent of 45%. The application for certified seed has not, however, been easily adopted/ accepted by farmers because of intricacies of technology and practices connected with it. In order to raise productivity of wheat crop on a sustainable basis, it is necessary to promote production and use of certified seeds.

Therefore, it is absolutely essential to promote use of certified seed. Government of Punjab in collaboration with Federal government will give direct subsidies through e-voucher system. This direct subsidy will be provided on the purchase of certified wheat seeds bags (50 kg) from dealers of pre-qualified suppliers.
