B- BACKGROUND OF THE SCHEME

Keeping in view the importance of agriculture sector in the economy the government has launched Prime Minister's National Agriculture Emergency Program. Objective of the program is to increase agriculture productivity significantly over the next five years to around the sector. Pakistan has potential to drastically increase aggregate production of major crops but the gap in the yield per acre between progressive and ordinary farmers is double due to lack of application of certified seed and other factors.

Quality and certification of seed has a direct and significant bearing on productivity. An improved variety or hybrid can make a difference to production to the extent of 45%.

The application for certified seed has not, however, been easily adopted/ accepted by farmers because of intricacies of technology and practices connected with it.

In order to raise productivity of crops on a sustainable basis, it is necessary to promote production and use of certified/ hybrid seeds. Therefore, it is absolutely essential to promote use of certified seed by farmers.
